STARLINK & INTERNET INSTALLATION

Get connected — even where no one else reaches.

Professional Starlink setup — mounted right, sealed against the weather, and online in every room. Especially for rural and underserved homes that cable and fiber don't reach.

What's included

- **Site & sky-view survey** — the spot with the clearest, most unobstructed view of the sky.
- **Professional dish mounting** — roof, eave, pole, or ground, aimed for peak performance.
- **Clean cable routing** — tidy run into the home, kept out of sight where possible.
- **Weather-sealing** — every penetration and entry point sealed. No leaks.
- **Router & Wi-Fi setup** — network named, secured, and all your devices connected.
- **Speed & connection test** — real speeds verified and stable before we leave.
- **Walkthrough** — how to check status in the Starlink app and when to call us.

What you provide

- **Your Starlink kit** — bought from Starlink (dish, router & cable come in the box).
- **Power** — a standard outlet near where the router will live.

Popular add-ons

- Pole / mast mount for a higher, clearer view
- Extended cable runs
- Wi-Fi mesh nodes — signal in every room
- Cable concealment / conduit
- Grounding for lightning-prone areas
- Steep, high, or metal-roof mounting

Pricing	STARLINK KIT NOT INCLUDED
Standard installation	**$[299]**
Pole / mast mount	$[75–150]
Mesh node (installed)	$[50–100]
Extended cable (per 25 ft)	$[40–75]
Grounding kit & install	$[75–150]
Remote-area travel	by quote

Suggested pricing — set your final numbers. Customer purchases the Starlink kit from Starlink.

[90-day] workmanship warranty on every install — if anything about our work needs attention, we make it right. (Covers our workmanship, not Starlink hardware or service.)
